- 7.) Committee Business: The Vision committee invited the SkyRail representatives to present their monorail project to the committee. SkyRail executives presented a 20-minute explanation of the monorail concept for the Sepulveda Transit Corridor. This is a proven mode of transportation, it has unlimited capacity, and would travel above ground in the middle of the 405 freeway for 15 miles, it is the most affordable of the transit options. It will have 9 stations by the side of the freeway and several plans for accessing UCLA. It is capable of transporting 48,000 passengers per hour, daily. It will be a driverless system. There is no set timeline on when the final decision of what concept will be accepted by Metro. There were many interested residents that attended the meeting. With most not convinced this is the system they prefer.
