

Guide to Applying Insect Repellent

Español
中文
한국어

Wearing repellent correctly is the most effective way to prevent mosquito bites and any vector-borne disease. No matter the brand, look for active ingredients registered with the U.S. Environmental Protection Agency (EPA) and recommended by the Centers for Disease Control and Prevention (CDC).

Must have ONE of these Active Ingredients

DEET

For Ages:
2 Months and up

PICARIDIN

For Ages:
2 Months and up

**OIL OF LEMON
EUCALYPTUS**

For Ages:
3 Years and up

IR3535

For Ages:
6 Months and up

STEP 1

ALWAYS Read LABEL

Apply as recommended on the label. Always apply sunscreen first, then follow with insect repellent.

STEP 2

Spray Bottle Properly

Hold bottle 6-8 inches away from exposed skin and clothing. Apply in a slow sweeping motion. Spray in an open, ventilated area.

STEP 3

Use Hands to Evenly Distribute

Spray hands to apply repellent to the face. Remember other exposed skin such as behind the ears and neck. Always wash your hands after applying.

STEP 4

Spray on Clothing

Spray shirts, pants, socks, hats, but NOT underneath clothing. Wash all treated clothing before wearing again.

For Kids

Do not allow children to handle product. Always have an adults apply repellent on children. Adults should spray the palm of their hand first, and then apply the product on the children.
